

Rajab Ali Mehraban  
Faculty of Technic,

Double Degree in Civil Engineering, 2014

I got in to UI through SIMAK KKI. The learning system in english helps to improve my english skills to prepare myself when I transfer to the partner university. There are many foreign students doing their exchange program, therefore we could exchange experience and also knowledge with each other. The lecturers who teach in this programs are experts in their field and also fluent in english. And due to few students in the class, the relationship between students and the lecturer is quite close. I'm proud being an international undergraduate program student in UI, because I get a chance to go to the best abroad University and also at the same time entering the best national university.

Parents of Raisha R. Narasmarani  
Student of Psychology Double Degree Program UI

My youngest daughter's dream was to be graduated from a reputable University overseas majoring psychology. As a mother, I was worried about her well-being if she lives far from us, because she is still young and not mature enough. When I heard about the International Undergraduate Program UI offer, I was convinced that it was a beneficial program because students will be prepared academically. and by the time she leaves Indonesia after four semester studying in UI to continue her study overseas, she is more ready academically and mature enough to be responsible for completing her study and her own well-being. She really showed her best and I was happy for her.

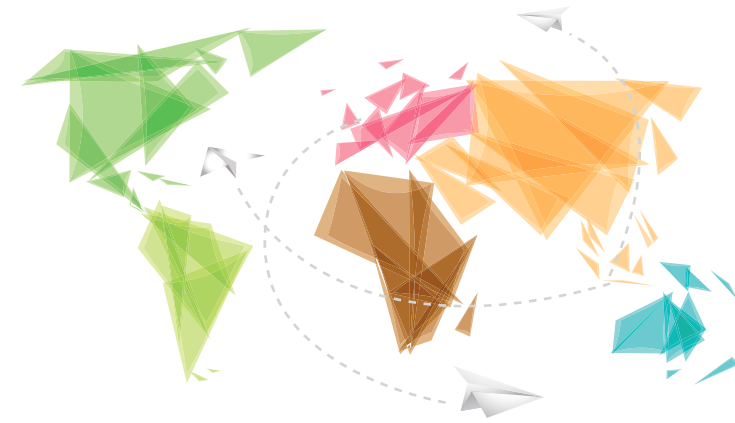

Salsabila Nurkhalisha  
Faculty of Economics and Business,  
Double Degree in Accounting 2014

I enter this program from talent scouting. One of the reason for choosing the program is because the international undergraduate program provides the international knowledge so it fits to face the globalization era. Study in here is never easy, but people are incredibly friendly and open-willing to start building friendships and achieving goals together. Through this mind-opening experience, I believe I will sharpen my skills in economy and accounting to face the future.
