

Rajab Ali Mehraban
Faculty of Engineering,
Double Degree in Civil Engineering, 2014

I got in to UI through SIMAK KKI. The learning system in English helped in improving my English skill to prepare myself for transferring to partner university. During my study time, there were many foreign students doing their exchange programs in the Undergraduate International Program in my faculty, thus giving me the benefit of experiencing an international atmosphere right at home. The lecturers in this program were experts in their fields and, needless to say, fluent in English. As the program was designed as small classes with limited capacity of students, the relationship between students and lecturers was quite close. I am proud of being an international undergraduate program student at UI, because I got the chance to go to the best universities, both locally in Indonesia and also overseas.

Diennaryati Tjokrosuprihatono Indonesian Ambassador to Ecuador
Parent of Raisha R. Narasmarani
Student of Psychology Double Degree Program UI

My youngest daughter's dream was to graduate from a reputable University overseas majoring in psychology. As a mother, I was worried about her wellbeing if she lives far from us, because she was still young and was not mature enough. When I heard about the International Undergraduate Program that UI offered, I was convinced that it was an answer to my prayers. This beneficial program will prepare students academically for the first two years that by the time the students will leave Indonesia to continue their study overseas, they will be more than ready academically and mature enough to be responsible for completing her study and her own well-being. My daughter showed her best and I was happy for her.

Salsabila Nurkhalisha
Faculty of Economics and Business,
Double Degree in Accounting 2014

I entered this program through the talent scouting program.. One of the reasons for choosing the program is because the international undergraduate program provided the international knowledge I needed to face the globalization era. Studying at Universitas Indonesian was never easy, but the people surrounding me, both fellow students and lecturers were incredibly friendly and were more than willing to start a friendship and believed in achieving goals together. Through this mind-opening experience, I believe that I will be able to sharpen my skills in economy and accounting for a brighter future.
